

DevOpsDaysTasks - Help Guide

Welcome to DevOpsDaysTasks!

This is a simple To-Do list application used for the DevOpsDays Graz workshop.

It demonstrates how to modernize delivery for a desktop app with CI/CD pipelines.

How to use:

1. Add a new task by clicking 'Add...'.
2. Import pre-defined tasks from Templates by clicking 'Add from Templates'.
3. Mark tasks as done or undone using the toolbar buttons.
4. Remove selected tasks with the 'Remove' button.
5. Open this Help file anytime by clicking 'Help'.
